

The government issued the "Blocked Call List" idea to stop telemarketers from harassing people during their personal time at home. XM allows me to get away from the incessant harassment of being bombarded with 5 minutes of ads for every 4 minutes of radio play.

Just like Napster has taught us...there will always be a need for companies to advance in different ways.

If you block XM, I'd like for you to also extend all US Patents from 17 years to 60 years. Seems only fair to protect these guys too, right?
